

3M™ Integrated Disc Media Unlocker

Peace of mind for your rapidly growing media collection

In today's economy, more people are turning to the library for free resources such as music, movies and games. As requests for these materials increase, libraries are realising an increased need for security and self-service. Integrated with the 3M™ SelfCheck™ System, the 3M

Integrated Disc Media Unlocker makes it easier than ever to protect and circulate your library's valuable media collection and it's the only integrated disc media security system that ensures the item checked out is the same item that is unlocked.

Enhanced Security

With the 3M Integrated Disc Media Unlocker, your expensive disc media collection will be better protected from loss. It will help eliminate the potential for substitution since only the disc that is checked out will be unlocked, and the security case provides an additional level of security.

Self-Service Enabled

The 3M Disc Media Unlocker will allow your customers to unlock checked out materials without the need for staff assistance. Fast and easy-to-use, simple instructions on the 3M™ SelfCheck™ System display screen will guide users through the unlocking process and verify that items are successfully checked out. The 3M Integrated Disc Media Unlocker has no extra parts to snap on and off while checking out and re-shelving cases.
